

“Meeting of the Minds”: Onboard Storage Container Standards Harmonization

Agenda:

Meeting Date: December 8th, at 9am EST

Meeting Location: SAE Headquarters in Troy Michigan, Metro Conference Room

Meeting Teleconference information:

Telephone Number: +712 884 1684

Passcode: 709535#

There are a number of standards from different international standards development organizations that are in draft form relating to the safety of the onboard storage containers. Unfortunately, they do not all align regarding to content or philosophy. Since many of these standard activities may eventually lead to regulations, it would be good to discuss this topic in order to attempt to harmonize direction regarding hydrogen storage.

As discussed in the TC 197 working group, they have delayed the final decision regarding the direction of WG 6 standard until the end of February. This is an opportunity to harmonize direction. This is a proposed initial meeting to kickoff this effort.

Draft Agenda (your feedback is appreciated)

- 1) Presentations of Individual Standards Efforts (20 minutes each):
 - a. ISO TC 197 WG 6 – Craig Webster/ TC 58
 - b. SAE J2579- Glenn Scheffler
 - c. EIHP- Paul Adams
 - d. CSA HGV2 – Julie Cairns
- 2) Roadmap of Activities (Who is doing what)
- 3) Harmonization Discussion of Specific Items
 - a. Cycle Life/ Counter
 - b. System Based Bonfire
 - c. Tank Burst Rating
 - d. Other items?
- 4) Discussion of Regulations, other standards
 - a. GTRs/ EU/ US
- 5) Further meeting
