

Douglas M. Rode, P.E.  
Principal & Managing Director

---

### **Biography: Douglas M. Rode**

Doug Rode is the Principal and Managing Director of the Hydrogen Safety, LLC, which is intimately involved with expediting the commercialization of alternative energy technologies through the prudent implementation of risk management strategies. Its business practices consist of:

1. Providing risk management counsel in terms of products, processes, and facility's designs, operations and maintenance;
2. Consulting for Insurance issues involving hydrogen and fuel cell technologies and projects, and
3. Hydrogen safety training in either a unique distance learning format that uses the Internet or as customized seminars that address specific client issues.

During his professional career, Doug held numerous managerial positions for both Hartford Steam Boiler Inspection and Insurance Company and Combustion Engineering (now Alstom Power). Since 2000, he has focused primarily on the hydrogen industry.

He is a Professional Engineer, and holds a BS in Mechanical Engineering from Villanova University and a MS in Management from Rensselaer Polytechnic Institute. He has two U.S. patents and has published over 25 technical and business publications.
