

Jim Ohi

Jim Ohi is a Senior Project Leader with the Hydrogen Technologies and Systems Center at the National Renewable Energy Laboratory (NREL) in Golden, Colorado. Jim has been with NREL since 1978 (then SERI) and has worked in technical, analytic, and management capacities for a number of technology development programs, including those for amorphous silicon photovoltaic materials, wind energy, buildings technologies, transportation systems, and bioenergy. His current work is focused on technical and programmatic support to the DOE Office of Hydrogen, Fuel Cells, and Infrastructure Technologies on hydrogen safety and codes and standards. He has also served as a team leader for advanced fuel cell R&D at NREL and as a principal investigator for NREL on renewable energy technology deployment to mitigate global climate change. He has worked with industry, federal agencies, state and local governments, and non-governmental organizations on the development, testing, and deployment of renewable and sustainable energy systems. Before joining NREL, he worked for the Governor of Colorado's Land Use Commission on energy and environmental regulation, and for county and city agencies in Colorado and California on environmental and land-use planning and regulation.
