

***Free Online Training!***

# **“Hydrogen Response Considerations”**

**This self-paced learning course on hydrogen awareness and emergency response focuses on four modules:**

- **Introduction to Hydrogen**
- **Hydrogen Properties and Hazardous Behaviors**
  - **Identifying Hydrogen in Your Community**
- **Appropriate Response to a Hydrogen Incident**

***Free Certificate of Completion***

**To register for this course, visit: [www.responder-elc.org/](http://www.responder-elc.org/) click: Create New Account in the blue box, then select, the course from the Available Courses page.**

(approximately two hours of training for this program)

The Electronic Learning Community (ELC) was created to provide a flexible and inexpensive means for emergency first responders to receive high quality training. A major goal of this initiative is to create a training program that reaches the widest possible emergency response community. The ELC is open to everyone so that it can be accessed as a training resource for emergency first responders. This “Hydrogen Response Considerations” course has been developed as the first subject to pilot this ELC concept. The ELC hopes to expand its available content to include topics on additional alternative energy sources, emerging technologies, and other issues important to the emergency response community.

The ELC is made possible through a cooperative agreement between the International Association of Fire Chiefs (IAFC) and the Department of Transportation’s (DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). Funding was provided by the DOT’s Research and Innovative Technology Administration (RITA).

For more information on this project, please visit the IAFC at [www.iafc.org](http://www.iafc.org)
